SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

1. This report of alleged "Flying Saucers" in the vicinity of Santa Catalina, which is just off the coast of Southern California, was reported by three (3) Boy Scouts in summer camp (Camp Fox) on 25 June 1952. No report has been made by electrical means due to the time lag in the receipt of the information at this installation.

2. A summary of the description follows:

a. The object was silver in color, altitude is uncertain, and speed estimated to be faster than a conventional Jet. There was no sound observed. One (1) maneuver was observed which was apparently a climbing turn immediately prior to its disappearance by disintegration.

b. The occurrence was at 1200 hours (PSDT). Length of time observed is not recorded.

c. The sighting was made by three (3) Boy Scouts during a hike up one of the mountains on Santa Catalina Island.

d. No observing instruments of any sort were available. The three (3) observers were all in the same group at the time.

e. No estimate of the reliability can be attempted by the reporter. The experience of the observers is probably meager at best.

f. Sky conditions were clear and unlimited. No reports on wind conditions.

g. A rough sketch is inclosed on two (2) of the Inclosures of what the observers saw.

DOWNGRADED AT 3 YEAR INTERVALS;
DECLASSIFIED AFTER 12 YEARS.
